Hi there!

My name is [REDACTED] and I am currently a master's student [REDACTED] I also work as a contaminated land scientist around my study at [REDACTED].

I am due to start writing my dissertation for my master's degree in July and am undertaking a study on sheep dips, specifically identification of dips and spray showers and pattern of contamination associated with each dip.

For this study, I am hoping to collate existing data and also complete some ground truthing. For the collation of data, I am requesting sheep dip/shower soil contamination reports/investigations from Councils in order to mine the data and create a base to my study.

Would you please be able to provide me with copies of all sheep dip and shower soil contamination reports/investigations that your Council holds? I understand that there may be some sensitivity around these reports due to the nature of the information, so am happy to enter a data use agreement if need be. I can also send a shared folder link that the files can just be dropped into if it is of use to you?

Would you please be able to let me know prior to sending these if there will be a cost involved?

I look forward to your response.

Many thanks,

[REDACTED]
