[2025-0211 Water Shutdown Records LGOIMA 457423 DC1.xlsx](#)

Kia ora,

We refer to your information request below. Hamilton City Council provides the following response.

Your request:

Project Summary

Introduction

Planned and unplanned outages can disrupt drinking water supply systems, potentially compromising water quality and posing risks to public health. This research is part of a Master's project at the University of Canterbury supervised by Associate Professor [REDACTED] and Associate Professor [REDACTED]. The project aims to investigate the relationship between drinking water outages, pipe characteristics (such as material, age, and condition), and water quality. By examining these factors, the study seeks to assess their collective contribution to the risk of enteric diseases in Aotearoa. The findings will help identify opportunities to improve water system resilience and safeguard public health. Specifically, this study aims to examine:

- 1. The relationship between pipe characteristics and water outages.*
- 2. The relationship between water outages and water quality.*
- 3. How these factors collectively inform the association between water outages and enteric disease notifications.*

Request for Water Outage Data

To support this work, I kindly request access to your council's records of planned and unplanned water outages, as far back as records are available. To ensure consistency across submissions from multiple councils, it would be preferred if the data is formatted in Microsoft Excel. The most important variables that we require are:

- Outage Date: in DD/MM/YYYY format*
- Outage Duration: in hours or able to be inferred by other variables ("water stopped at" AND "water restarted at")*
- Outage Location: Ideally this would be in the format: - "Street number (10), street name, suburb, city" (ideally in separate columns or comma separated - see below example) or latitude and longitudinal coordinates.*
- If your location information is not in this format (e.g. range of addresses, multiple streets etc) could you suggest possible ways to determine a point location for the outage.*
- Outage Type: whether the outage was planned or unplanned and what definitions are used by the council to define these classifications. If unknown, please include any notes on the nature of the outage and confirm there is not a consistent definition for these classifications.*

22.01.25

Please provide data to:

Data Storage and Use

The data will be used in the investigation of drinking water outages on enteric disease in Aotearoa.

- The data will be stored securely by the University of Canterbury on its local servers.*
- The data will only be accessed by researchers involved in the study from the University of Canterbury.*
- A copy of the results of the study will be provided to Drinking Water Suppliers.*
- The data sources will be acknowledged in any papers published.*
- The data provided on each water supply may be used for future epidemiological studies by the research team at the University of Canterbury.*

Our response:

The attached spreadsheet provides information that can be easily retrieved from our data management systems relating to our planned and unplanned shutdowns between January 2017 – December 2024; it includes the start date, street name, suburb and whether the shutdown was planned or unplanned. Water service was resumed within an 8-hour period for all planned and unplanned outages.

Please let us know if there is a specific shutdown that you would like further details we can provide. This is a manual process so we can't extract all of them without substantial collation, we could look at charging but this would impact the daily duties of staff.

You have the right to seek an investigation and review by the Ombudsman of this decision. Information about how to make a complaint is available at www.ombudsman.parliament.nz or freephone 0800 802 602.

Ngaa mihi

Subject: Hamilton LGOIMA: Investigating the impact of drinking water outages on enteric disease in Aotearoa

Tēnā koutou ,

My name is [REDACTED] a Master's student at the University of Canterbury, conducting research on the impact of drinking water outages on enteric disease in Aotearoa. My project is supervised by Associate Professors [REDACTED] and aims to provide insights that can help improve water system resilience and public health outcomes.

Please find attached an official Local Government Official Information and Meetings Act (LGOIMA) request for access to your council's records of drinking water outages. I appreciate your time and consideration, and I am happy to discuss this further if needed.

If you have any questions, please feel free to contact me at

Water Planned & Unplanned Shutdowns

Hamilton City Council

*** Definitions of 'Planned' and 'Unplanned' Shutdowns

A 'planned' shutdown is a water outage where affected customers are informed at least 48 hours in advance. Any other shutdowns are considered 'unplanned'.

Street name	Suburb	City	Start Date	Start Time	Planned or Unplanned
Blomfield Street	Nawton	Hamilton 3200	30/12/2024	8:58:00 AM	Unplanned
